- Full Day Weekend Class Option

IT THREATS ARE EVERYWHERE. ANSWER THE CALL.

In a time of rising security threats, organizations are taking proactive measures to anticipate attackers and protect sensitive assets. The IT Networking & Security Program from AllSkilled will validate your technical competency in IT security. You will learn to analyze, test, troubleshoot, and evaluate existing network systems as well as perform network maintenance to ensure networks operate correctly with minimal interruption.

PROGRAM TIMELINE

Our 12 week IT Network & Security program is packed with concepts around vulnerabilities, knowledge of different security tools, information on identity management, and procedures to respond to security incidents. Here's the breakdown of your 12 week program.

WEEKS 1-3

CompTIA IT Fundamentals+ (ITF+):
Acquire the essential skills and information needed to install, configure, optimize, troubleshoot, repair, upgrade, and perform preventive maintenance on PCs, digital devices, and operating systems.

WEEKS 4-8

CompTIA Network+:
Learn networking concepts to plan, install, maintain, and upgrade a network using a consistent methodology and secure organizational policies.

WEEKS 9-12

CompTIA Security+:
Evaluate and examine security policies, implement account management security controls, and how to utilize security measures to protect data and information.
