IT THREATS ARE EVERYWHERE. ANSWER THE CALL.

In a time of rising security threats, organizations are taking proactive measures to anticipate attackers and protect sensitive assets. The IT Networking & Security Program from AllSkilled will validate your technical competency in IT security. You will learn to analyze, test, troubleshoot and evaluate existing network systems—such as local area networks (LAN) and wide area networks (WAN)—as well as perform network maintenance to ensure networks operate correctly with minimal interruption.

PROGRAM TIMELINE

Our 3-month IT Networking & Security Program is packed with concepts around vulnerabilities, knowledge of different security tools, information on identity management, and procedures to respond to security incidents. Here's the breakdown of your 3-month program.

WEEKS 1-3

Acquire the essential skills and information needed to install, configure, optimize, troubleshoot, repair, upgrade, and perform preventive maintenance on PCs, digital devices, and operating systems.

WEEKS 4-8

Learn networking concepts to plan, install, maintain, and upgrade a network using a consistent methodology and secure organizational policies.

WEEKS 9-12

Evaluate and examine security policies, implement account management security controls, and how to utilize security measures to protect data and information.
